

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security. Additionally I use my calling cards for economical reasons. I can not afford the charges to make limited long distant calls. I don't want to lose these benefits. I urge you to reject the proposal to move the USF collection system to a flat-fee. Please reject this policy that places more financial burden to keep these features of freedom from economically disadvantaged people.

Keep the USF Fair!
Sincerely Mark Ring Rhinelander wi.

Sincerely,

Mark Ring
